

IT 161: Wireframes and Flowchart

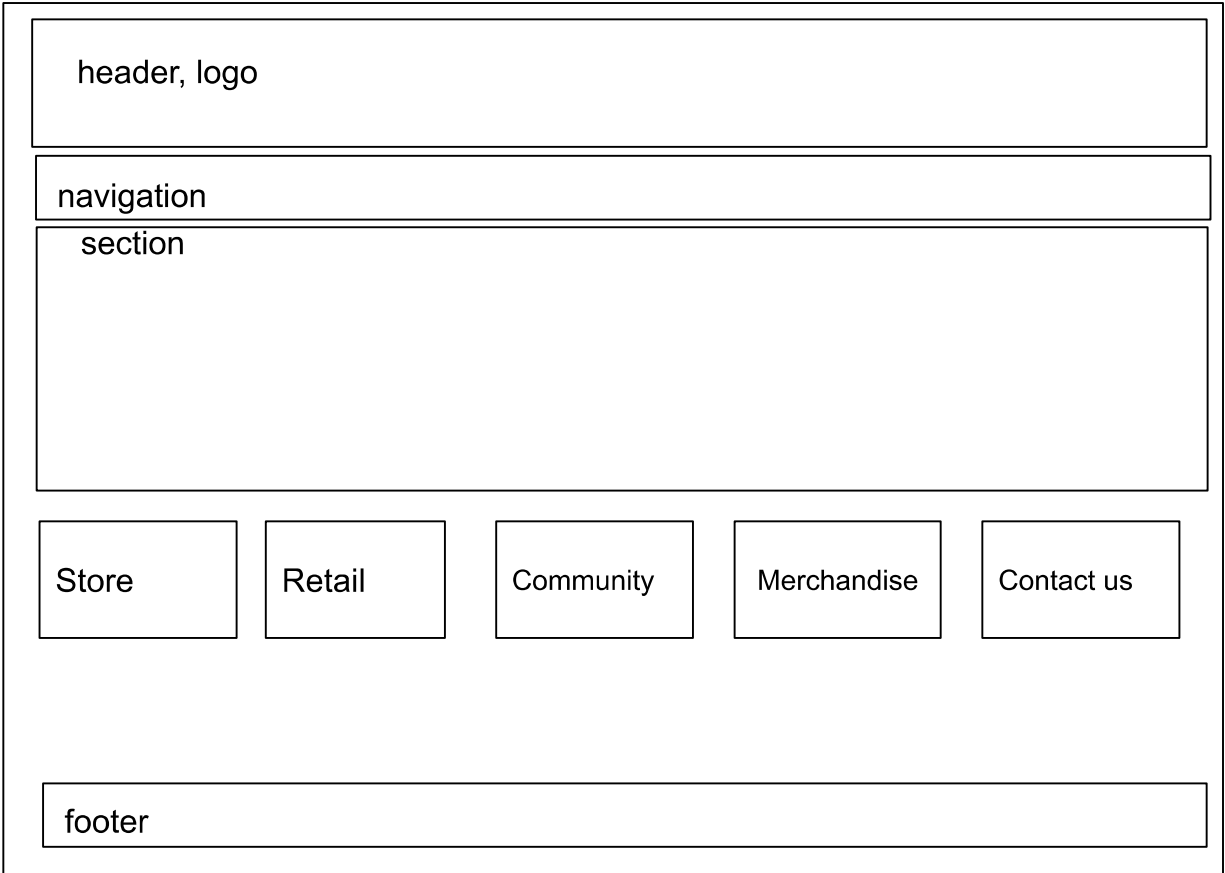

This is how I anticipate the document will look like as a flowchart and wireframe or a template for how the website will be mapped out. Below are three links to the websites that I think best represent the new adaptations for the redesigned website. These will serve as a base for my class project.

- 1) <https://www.caffevita.com> - Caffe Vita
 - a) Gives more attention to the brands they sell
 - b) Has a subscribes and rewards tab
 - c) Color palette warm and inviting
- 2) <https://www.divaespresso.com> - Diva Espresso Coffee
 - a) Pictures & offerings
 - b) Café location with map
- 3) <https://broadcastcoffeeroasters.com> - Broadcast Coffee
 - a) There animated home page
 - b) Their location listing by address that's hyperlinked to a Google location
